..that are Struggling with their Nutrition,

Mind-space (also known as mindset ;)) Fitness..and related issues ..?

Women aged 35 (even as early as 25-30 now) to 50 years old, generally have Challenges with a few extra pounds, and hormonal changes.

And their challenges are made even worse by ALL the misinformation out there in the fitness, and health & wellness industries..
(or guys selling "hormonal fitness programs for women..like they have a clue about women's hormones.." ??

Add in the lack of support from traditional medicine..
Or the stigma still associated with "women's health issues", chronic pain, or related health challenges.

Sound like you, or Anyone you know??
