01:22:55 David Marsden DT: Steve, you must see the YouTube videos by Peter Zeihan regarding AI and the demographic and political challenges and changes that may occur with regard to the end of China and the chip shortage that will create a 2 decade chip shortage until the manufacture is onshored back in the US or alternative especially for AI chips the most advanced chips only made in Taiwan. Also another issue with AI is recognising when it's producing incorrect responses or errors. Proofreading is as always a very important skill. Remember the old computer saying "GIGO" "Garbage in, Garbage out". Here we go again 40 years later.
